

About **TREE**

Our Roots

Founded by esteemed alumni from IIT Guwahati, IIT Bombay, and IITB-Monash Research Academy, TREE pioneers with top-tier expertise in Civil and Environmental Engineering.

Our Pledge

We provide customized, innovative solutions that are cost-effective and sustainable.

Our Reach

India, Hungary, Singapore & the US.

Domestic presence: Karnataka, Andhra Pradesh, Tamil Nadu, Diu & Daman, Maharashtra, Gujarat, and UP.

Why Choose Tree?

Global Reach

Top environmental experts worldwide.

Expert Solutions

We deliver the best advice and cutting-edge solutions.

On-Time, Every Time

Count on us for timely and reliable service.

Innovative & Sustainable

We create effective, eco-friendly strategies for a greener tomorrow.

Connect with Innovation.
Grow with **TREE**.

Engineering a Greener Tomorrow.

TREE
Green Solutions

Technology & Research in Environmental Engineering

At **TREE**, we deliver novel, economical, and innovative solutions tailored to the needs of our industry clients.

Innovative Industry
Solutions for a
Pollution-Free Future.

At **TREE**, we deliver comprehensive water solutions that sustain communities and ecosystems alike.

Water & Groundwater Treatment

Treatment Facilities

- Water Treatment Plants
- Reverse Osmosis (R.O.) Plants
- Softeners and Iron Removal Plants

Distribution & Management

- Water Distribution Networks
- Rainwater Management Systems
- Water Resource Management

Ecological Enhancements

- Lake Rejuvenation Projects
- Land Reclamation Projects

Risk Assessment

- Flood Risk Assessment and Modeling
- Environmental Morphological Studies

Operation & Maintenance

- Dedicated maintenance for effluent, sewage and wastewater treatment facilities.

Revitalizing Wastewater

Purify and Preserve with TREE

- STP (Sewage Treatment Plant): Clean and clear solutions for urban waste.
- ETP (Effluent Treatment Plant): Tailored treatments for industrial effluents.
- ZLD Plants: Zero compromise on waste, achieving total liquid discharge control.

Harness Nature's Power

- Natural Systems: Embrace constructed wetlands for eco-friendly purification.

Design Beyond the Basics

- Water Networks: Expertly designed distribution systems for seamless flow.
- Rainwater Systems: Innovative capture and reuse strategies.
- Sewerage Systems: Advanced planning for modern demands.

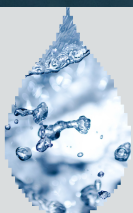

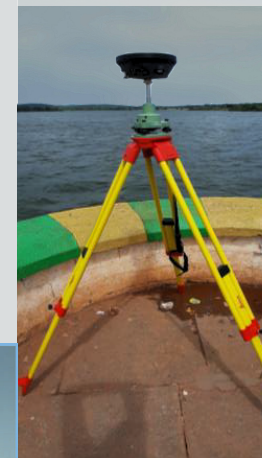

TREE: Tailoring Sustainable Solutions for Every Environmental Challenge. Because One Size Doesn't Fit All.

Morphological & Topographical Studies

- Drone & DGPS Survey for Project Planning
- Monitoring & Risk Assessment
- Topographical studies
- Bathy-metric survey
- Pipeline survey
- Land survey
- Landfill survey

Purifying the Present,
Preserving the Future.
